MnDOT ADA Compliance Checklist for APS

SP: City: District:
 Intersection: Quadrant:
 Construction Year:

Compile all relevant document (photos, notes, etc) of the completed quadrant and send to ADAComplianceChecklists.dot@state.mn.us

- 1) Are push button stations placed and push button faces oriented in accordance with standards? Yes No
- 2) Is there a minimum 4' x 4' landing adjacent to each push button? Yes No
- 3) Distance from crosswalk edge to push button face (ft):

<input type="text"/>	<input type="text"/>
Trunk Hwy	Side Street
- 4) Distance from the push button to the back of curb: (measured in the direction of the pedestrian travel in ft)

<input type="text"/>	<input type="text"/>
Trunk Hwy	Side Street
- 5) Distance between push buttons (ft):
- 6) Push button height (inches):

<input type="text"/>	<input type="text"/>
Trunk Hwy	Side Street
- 7) Push button side reach (inches):

<input type="text"/>	<input type="text"/>
Trunk Hwy	Side Street
- 8) Is APS system fully compliant? Yes No

If **NO**, check one of the following reasons why. Explain why the component(s) didn't meet compliance (see ADA Compliance Checklist Guidance for additional directions).

- Topography Structure(s) Utilities Contractor MnDOT

- 9) Has a 6' maintenance access route (MAR) been maintained? Yes No
- 10) Are push buttons situated at least 2' away from both the back of walk and ramp grade break? Yes No
- 11) Are all newly constructed hand-hole(s) located outside of pedestrian access route (PAR)? Yes No
- 12) Push buttons placed according to the plan details? Yes No

If no, please describe/explain:

Printed Name: Date (mm/dd/yyyy):

I certify that the information entered on this form is accurate to the best of my knowledge and that I fully understand the checklist standards and am qualified to carry out the inspection.

FILL OUT FORM AND SAVE. ZIP ALL SAVED FILES AND SUBMIT TO MNDOT ADA

MnDOT ADA Compliance Checklist (Curb Ramp)

SP: City: District:
 Intersection: Quadrant:
 Ramp Type: Const. Year:

Compile all relevant document (photos, notes, etc) of the completed quadrant and send to ADAComplianceChecklists.dot@state.mn.us

- (1) Minimum 4' wide pedestrian access route (PAR) maintained? Yes No
- (2) Landing meets min. 4'x4' and perpendicular grade break(s)? Yes No
- (3) Are landing(s) located at the top of each ramp and at change(s) in direction and at inverse grades? Yes No
- (4) Landing slopes (%):

<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>
(TH)	(TH)	(SS)	(SS)
- (5) Ramp's running slope (%):

<input type="text"/>					
Initial	Secondary	Initial	Secondary	Initial	Secondary
- (6) Ramp's cross slope (%):

<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>
Initial	Secondary	Initial	Secondary
- (7) Gutter flow line slope (%): TH SS
- (8) Gutter inslope (%): TH SS
- (9) Roadway cross slope (%): TH SS

TH = Trunk Highway
SS = Side Street

- (10) Do truncated domes cover the entire curb opening and are they properly oriented? Yes No
- (11) Are gutter line and ramps draining properly? Yes No
- (12) Are there any vertical discontinuities greater than 1/4" ? Yes No
- (13) Do ramps comply with Spec 2521.3? Yes No
- (14) Are ramps fully compliant? Yes No

If **NO**, check the reason(s) below. Explain why the ramp didn't meet compliance and how the ramp has been improved from the pre-construction condition (see ADA Compliance Checklist Guidance for more info and attach pages if needed).

- Topography Structure(s) Utilities Contractor MnDOT

- (15) Was the curb ramp able to be built according to the plan details? Yes No

If **NO**, please explain:

Printed Name: Date (mm/dd/yyyy):

I certify that the information entered on this form is accurate to the best of my knowledge and that I fully understand the checklist standards and am qualified to carry out the inspection.

ADA Project Compliance Submittal*

*To be completed by the Project Engineer/Supervisor

SP#: City: TH(s):

Project Engineer/Supervisor: Construction Year:

Project Chief Inspector:

Lead ADA Inspector:

Prime Contractor:

Project Description (Stand alone, Mill and Overlay, Reconstruction, etc...)

Company/Firm (e.g. MnDOT) Designer Name

Project Designed by:

List of Sub-Contractor(s) working on ADA:
 (rate 1 to 5 for each contractor, 1 being *poor* and 5 being *excellent*)

Type	Contractor	Rating	Remarks

Did Contractor(s) provide a responsible person familiar with PROWAG to be on site during all ADA construction as per Special Provisions 1803? Yes No

PROWAG Specialist:

Number of APS Quadrants Number of NON APS Quadrants

Was a portion of any quadrant required to be rebuilt or redone? Yes No

Number of REDO's

How many ramps needed to be redone were contractor's responsibility? -

How many ramps needed to be redone were MnDOT's responsibility? -

How many were plan errors? -

Other -

Number of NON-COMPLIANT ramps due to:

Topography Utilities Structure(s)

Additional Remarks

I certify that the information entered on this form and the submitted compliance checklist forms are accurate to the best of my knowledge and were completed by me or under my direct supervision.

SHARE POINT

A web site that provides a central storage and collaboration space for documents, information, and Ideas.

ADA Compliance Checklist

NOTE:

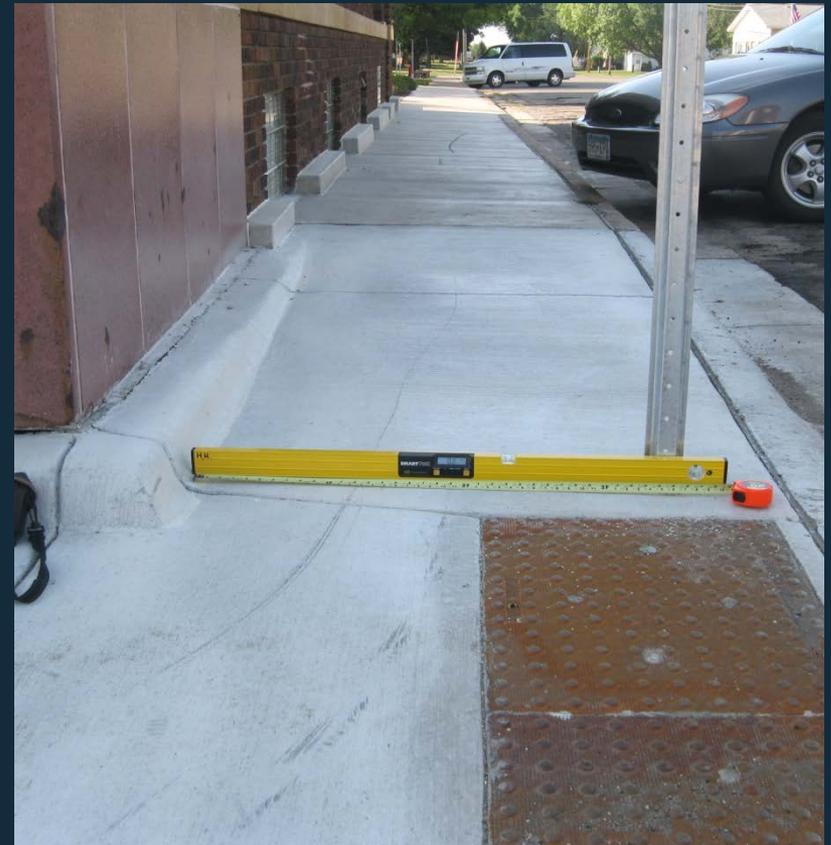

- Documentation shall record the largest cross slope value, and running slope value after checking several locations.

- If any portion of the ramp is non-compliant provide a detailed explanation why ramp cannot be constructed fully compliant.

(1) PAR

1) Minimum 4 ft. wide Pedestrian Access Route (PAR) with maximum cross slope of 2%

ADA Compliance Checklist

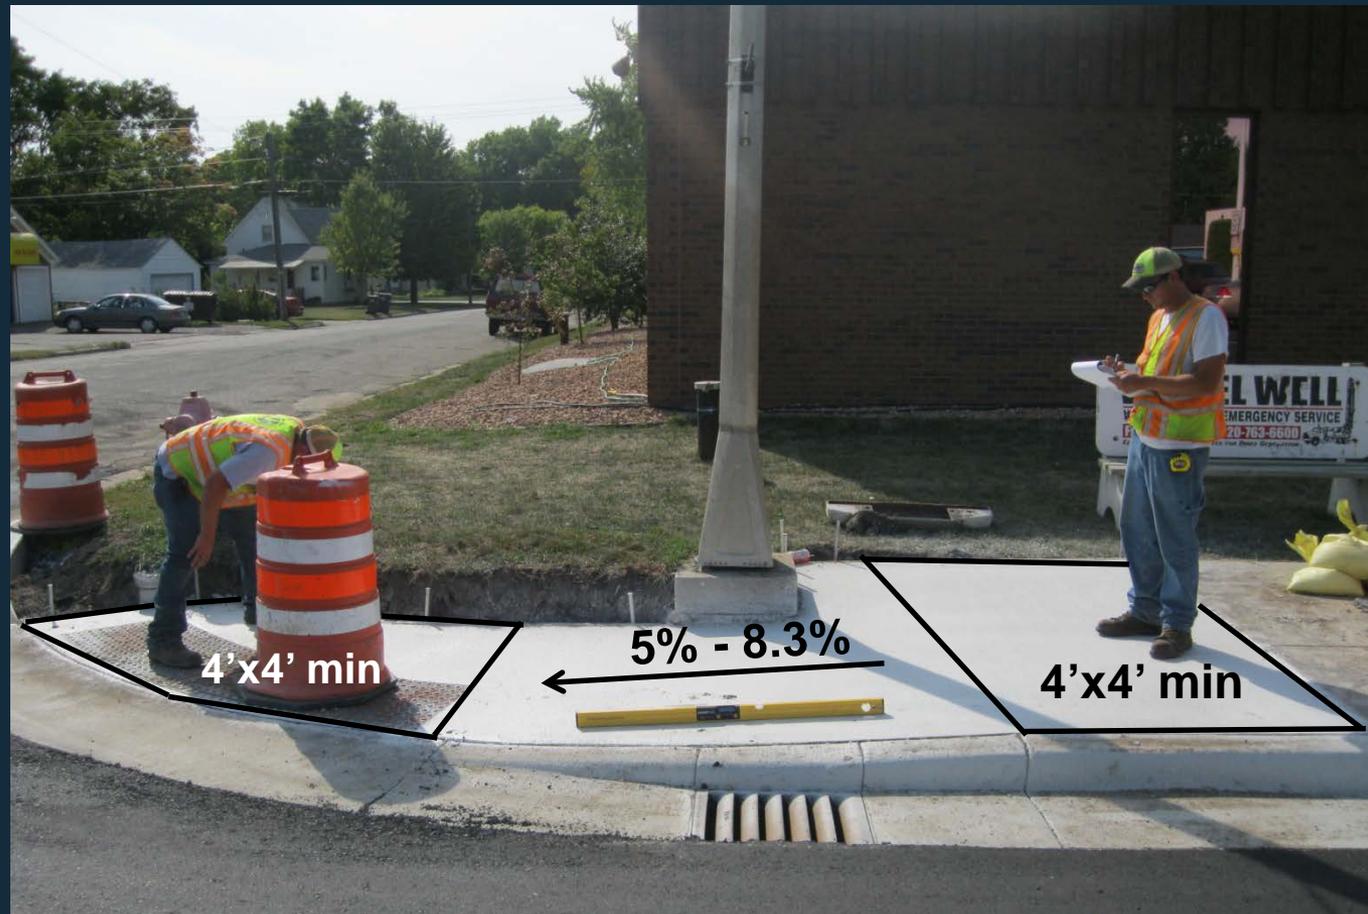

2) Landing dimensions are a minimum 4' x 4' and perpendicular grade breaks.

ADA Compliance Checklist

3) Landings are located at the top of each ramp. Is it over 5%? Is there a change in direction? Are there inverse grades approaching the landing?

ADA Compliance Checklist

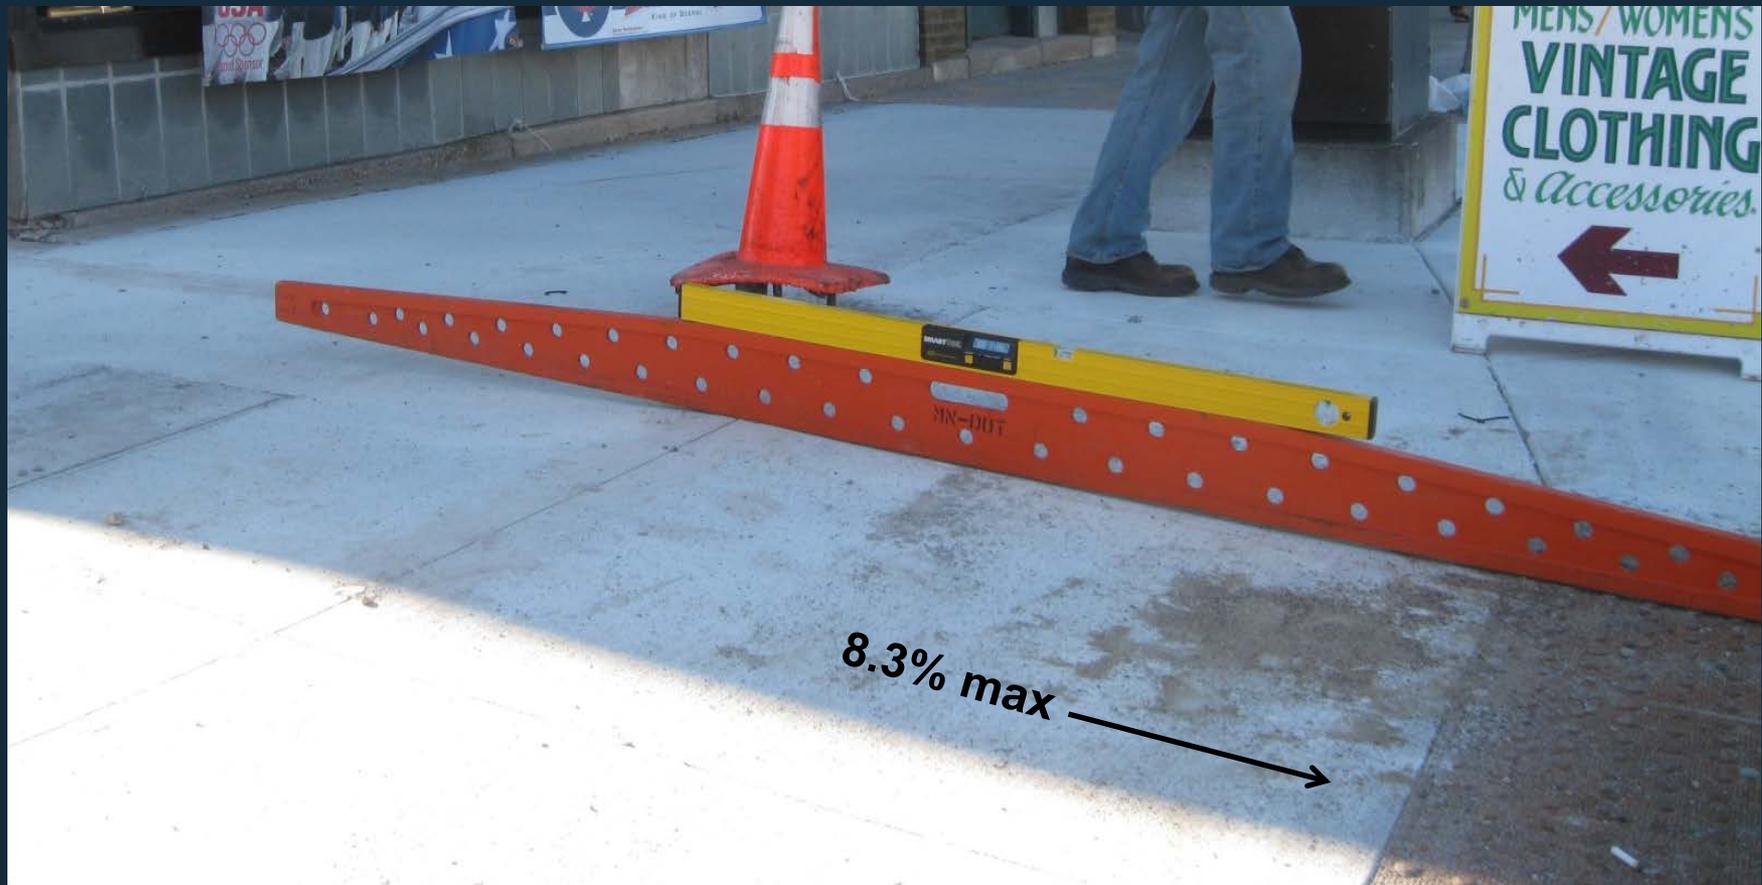

4) Record landing slopes (max. 2% in any direction)

ADA Compliance Checklist

5) Ramp's running slope must be less than or equal to 8.3%.

ADA Compliance Checklist

6) Ramp's cross slope must be 2% maximum.

ADA Compliance Checklist

7 & 8) Record gutter flow line slope and inslope.

ADA Compliance Checklist

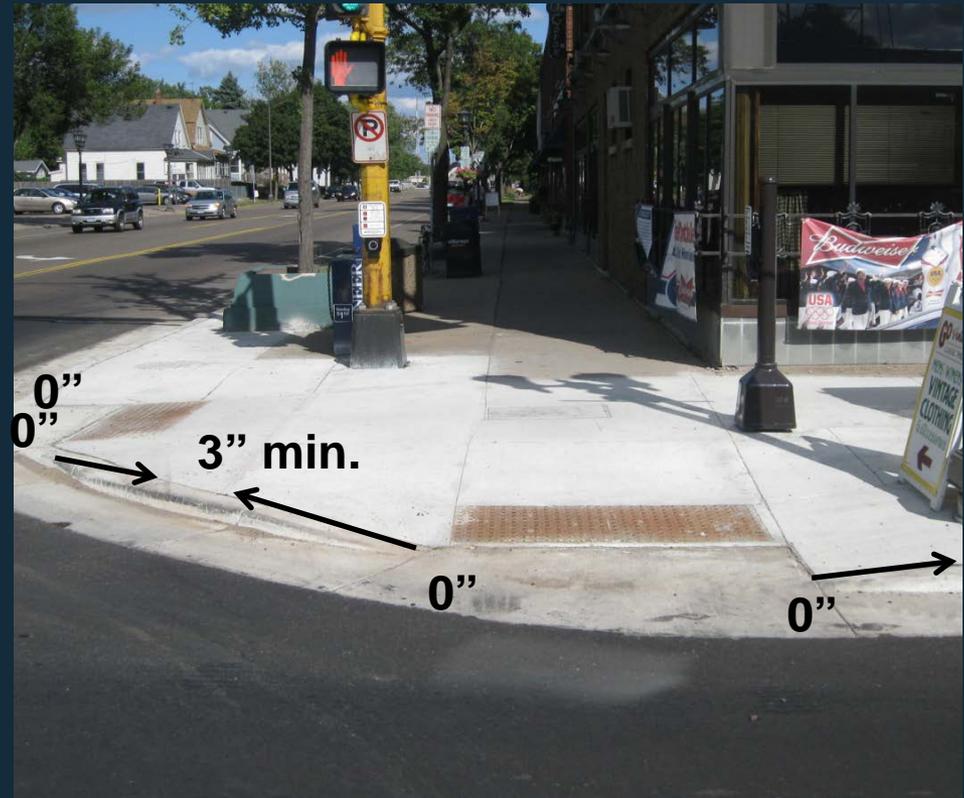

9) Roadway Cross slope is measured perpendicular to curb flow line or edge of roadway and should not exceed 5% at pedestrian crossings.

ADA Compliance Checklist

10) Curb tapers are considered a detectable edge when tapers start within 3" of truncated domes and rise to a minimum 3" curb height.

ADA Compliance Checklist

10) Truncated domes cover the entire curb opening and meet setback criteria.

Shall be 2 ft. max offset adjacent to walkable surface

Detectable Warnings
Minimum 4' wide

Shall be 5 ft. max offset adjacent to non-walkable surface

ADA Compliance Checklist

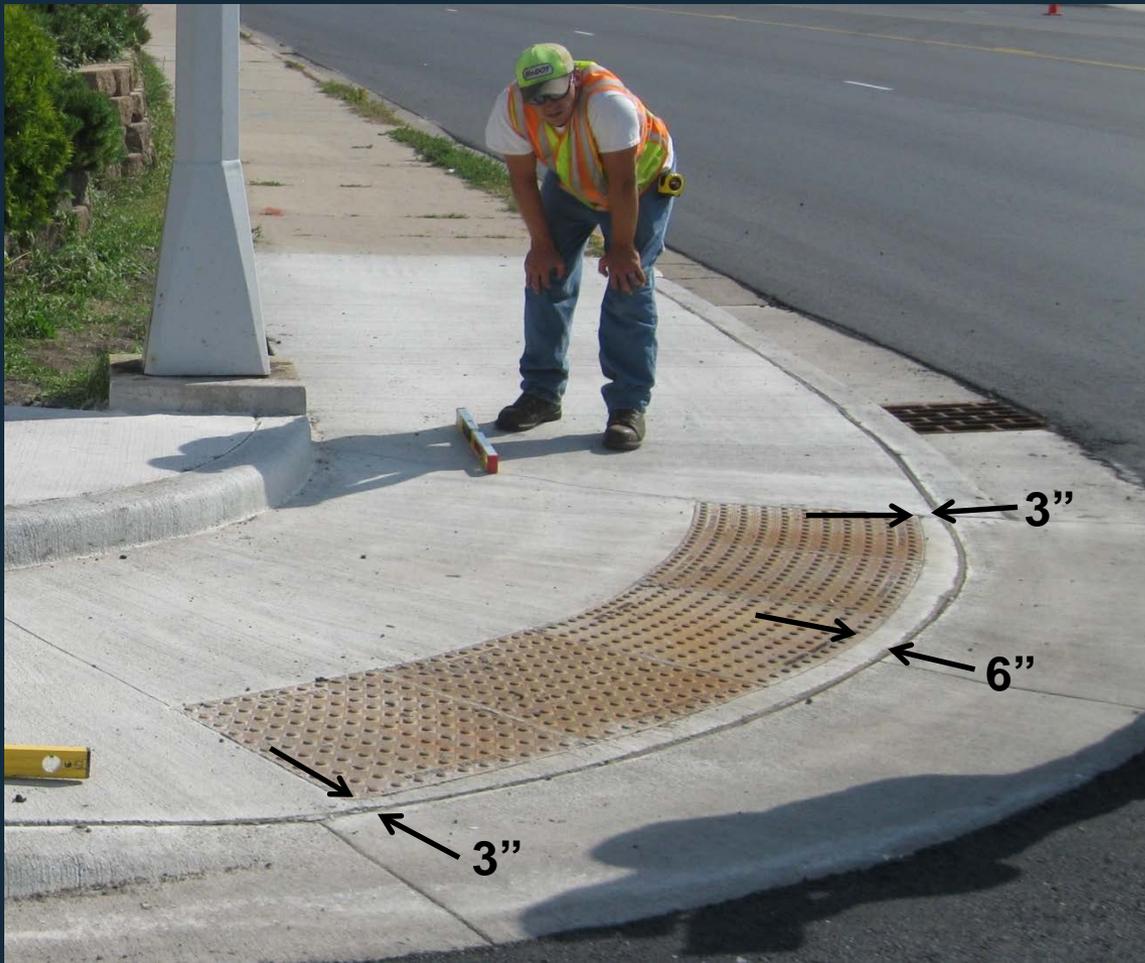

10) Truncated domes shall extend full width of the ramp landing or Blended transition within 3" on either end

ADA Compliance Checklist

10) Radial Detectable warnings shall be set back 3" to 6" from back of curb.

ADA Compliance Checklist

10) Radial Detectable warnings shall be set back 3" to 6" from back of curb.

ADA Compliance Checklist

10) Whenever rectangular domes are placed around a radius, they may be set back up to 9" in the middle and 3" at the corners.

ADA Compliance Checklist

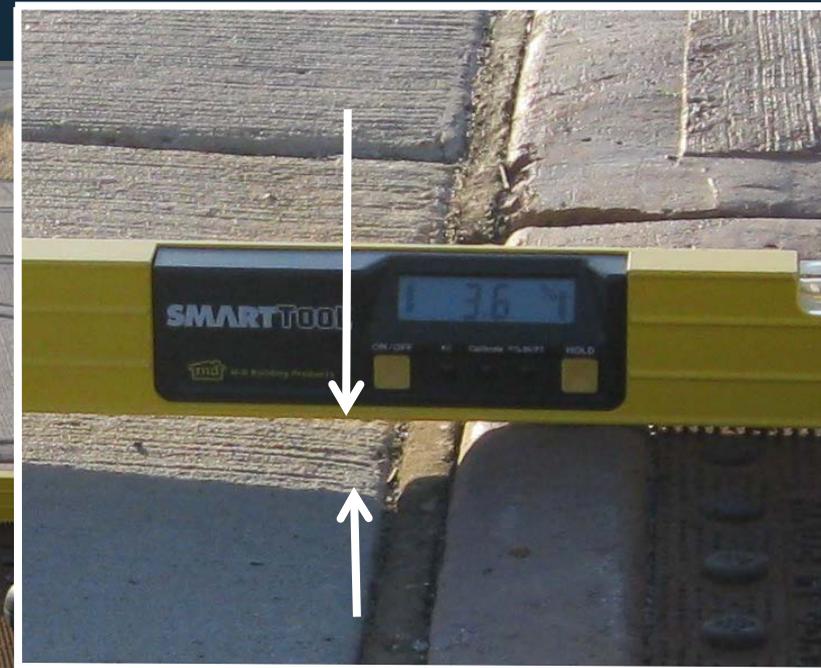

11) Check gutter line and ramps are draining properly and not holding water. Check after rain event.

ADA Compliance Checklist

12) (1803) No vertical discontinuities greater than $\frac{1}{4}$ inch anything over $\frac{1}{2}$ inch and the panel should be replaced.

ADA Compliance Checklist

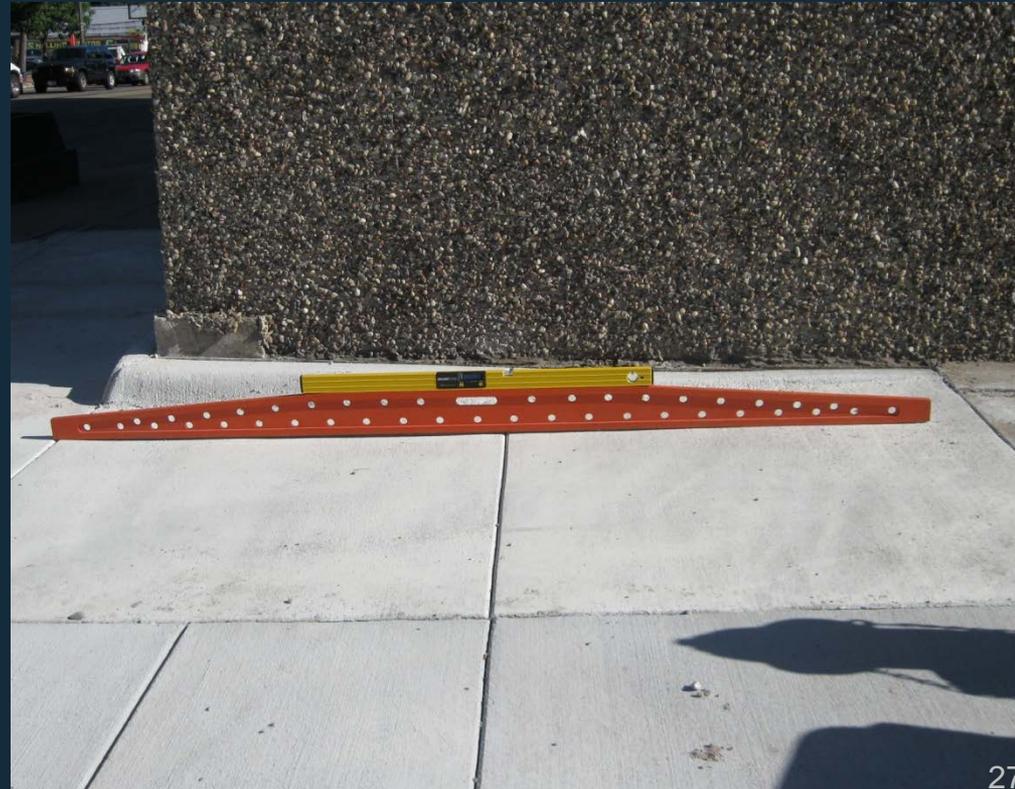

12) No vertical discontinuities greater than $\frac{1}{4}$ inch

ADA Compliance Checklist

13) Spec 2521.3: The Engineer will use a 10' straight edge to measure the surface. The department considers deviations greater than $\frac{3}{16}$ in. and deviations in formed concrete greater than $\frac{1}{2}$ in. from the required location as unacceptable work. Remove and replace unacceptable work as directed by the Engineer.

ADA Compliance Checklist

14) Are ramps fully compliant? If any portion of the ramp is not compliant, be sure to document pre-construction and post-construction ramp conditions and explain why the ramp cannot be fully compliant.

Always check correct box and explain if not fully compliant.

ADA Compliance Checklist

A) Topography : Elevated road slopes or steep existing flow lines. Secondary landing could not be constructed within 30 ft. of initial landing.

ADA Compliance Checklist

B) Structures : Ramp could not be constructed compliant due to existing structures such as buildings, steps, street signs ect...

Example: walkway attempting to tie into nearby entrance / steps and reducing space for compliant curb ramp construction.

ADA Compliance Checklist

C) Utilities: Existing utilities that could not be moved

- Both surface and underground utilities such as power poles, fire hydrants, street lights, signal poles, manholes, vaults ect...

D) Contractor Performance:

The ramp could have been constructed to be compliant, but the contractor failed in constructing the ramp in accordance with special provisions 1803 special project ADA requirements.

If any compliance standards are not met due to contractor performance, rework is required before the project is substantially complete. See Specification 1503 (Conformity with Plans and Specifications).

D) Contractor Performance:

If the ramp could have been constructed to be compliant, but the contractor failed in constructing a compliant ramp.

Submit both the noncompliant form and the corrected compliant form.

This is important project documentation that will need to be retained.

ADA Compliance Checklist

E) MnDOT personnel gave information / guidance that resulted in a noncompliant facility (Plans, Inspection or Surveys).

(1508) Construction Stakes Lines, and Grades

The Department is responsible for the accuracy of lines ,slopes ,grades , and other Engineering work performed by the department's personnel as specified in this section.

The contractor shall not knowingly take advantage of errors or omissions and shall report any discovered errors or omissions to the Engineer immediately upon discovery.

ADA Compliance Checklist

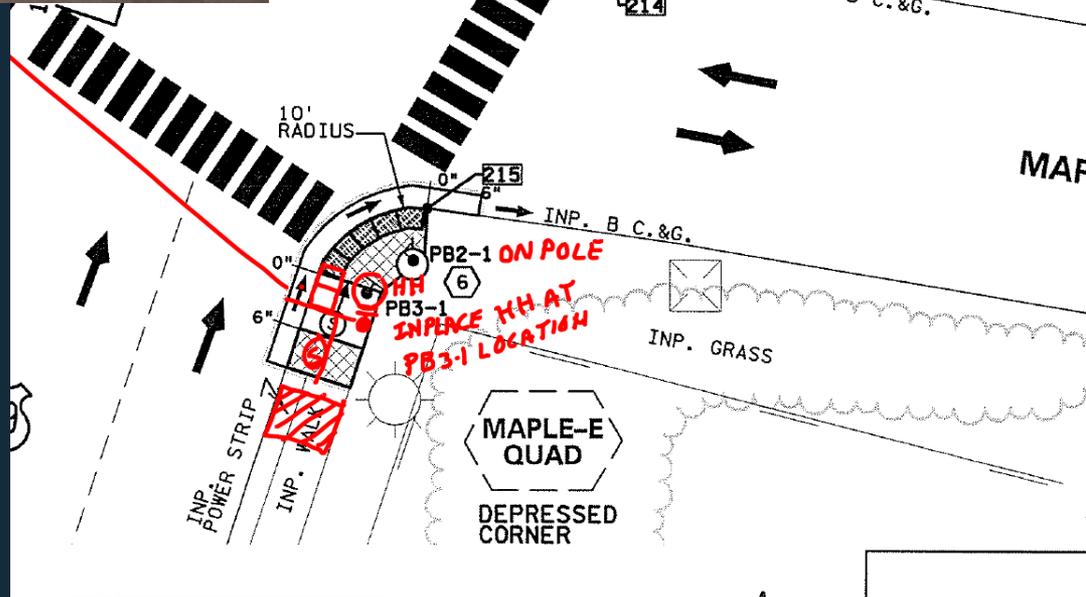

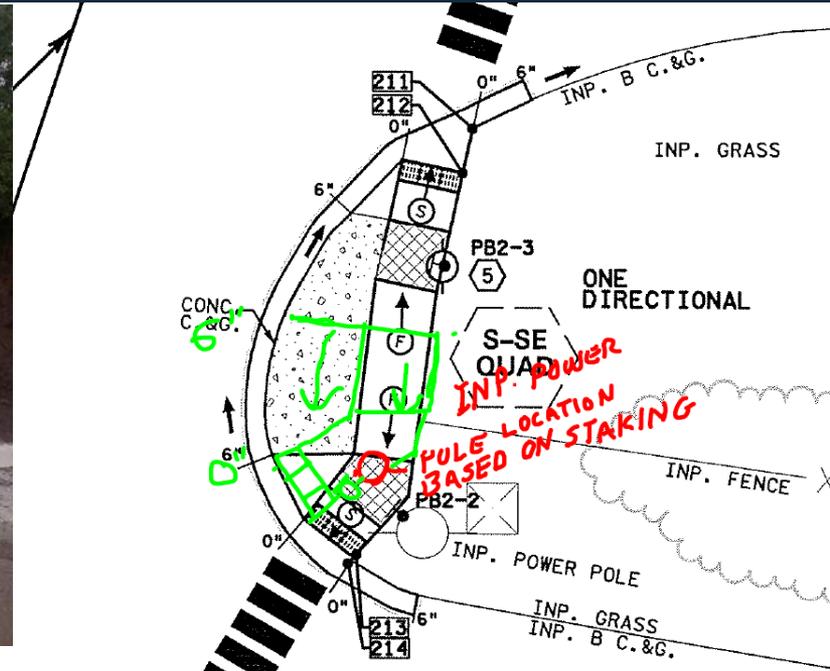

MNDOT Submittal: Submit form to SharePoint Library

NON MNDOT Submittal:

Email completed checklists to *DOT_ADA Compliance Checklists (or ADAComplianceChecklists.dot@state.mn.us for external users).

ADA Compliance Checklist

Was the ramp able to be built according to the plan details?

ADA Compliance Checklist

This would include

- Changes to the (S) or (F) values.
- Corrections in noncompliant gutter flow lines not called out in the plans.
- Change in ramp type.
- Changes to the PAR width.
- Modification of the landing dimensions.

This information does not affect compliance.

It will only be used for design improvements in the future.

APS Compliance Checklist

APS Compliance Checklists link to SharePoint and the Guidance is on ADA web site.

ADA Compliance Checklist Guidance [APS] (Accessible Pedestrian Signals)

All 2014 and future ADA work including carryover projects need to follow this guidance and compliance forms need to be entered electronically.

APPENDIX

APPENDIX

The bubble note in each figure represents the required data on the APS compliance checklist form.

Numbers on figure and on the APS form	DESCRIPTION
1	Push button orientation
2	Push button landing
3	Distance from crosswalk edge
4	Distance from back of curb
5	Distance between push buttons
9	Distance of push button(s) to front and back of landing
10	Maintenance access route (MAR)

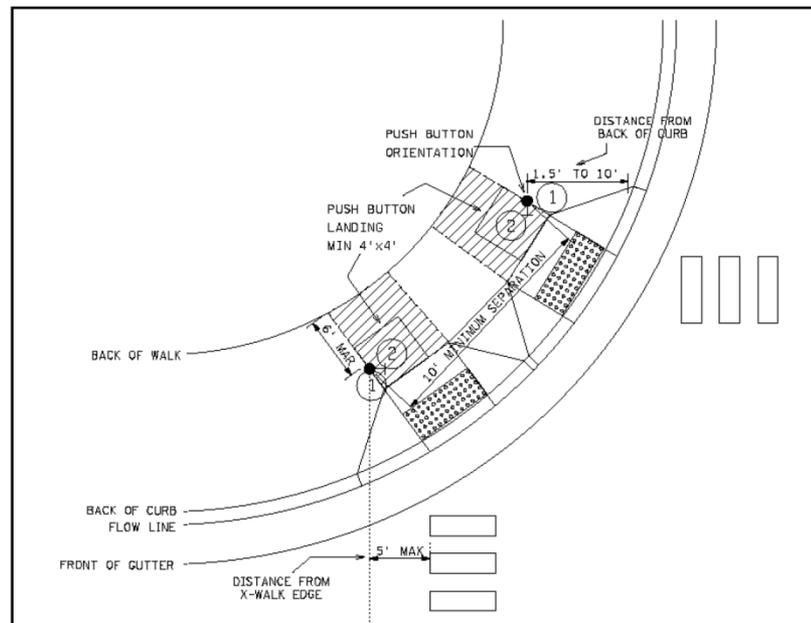

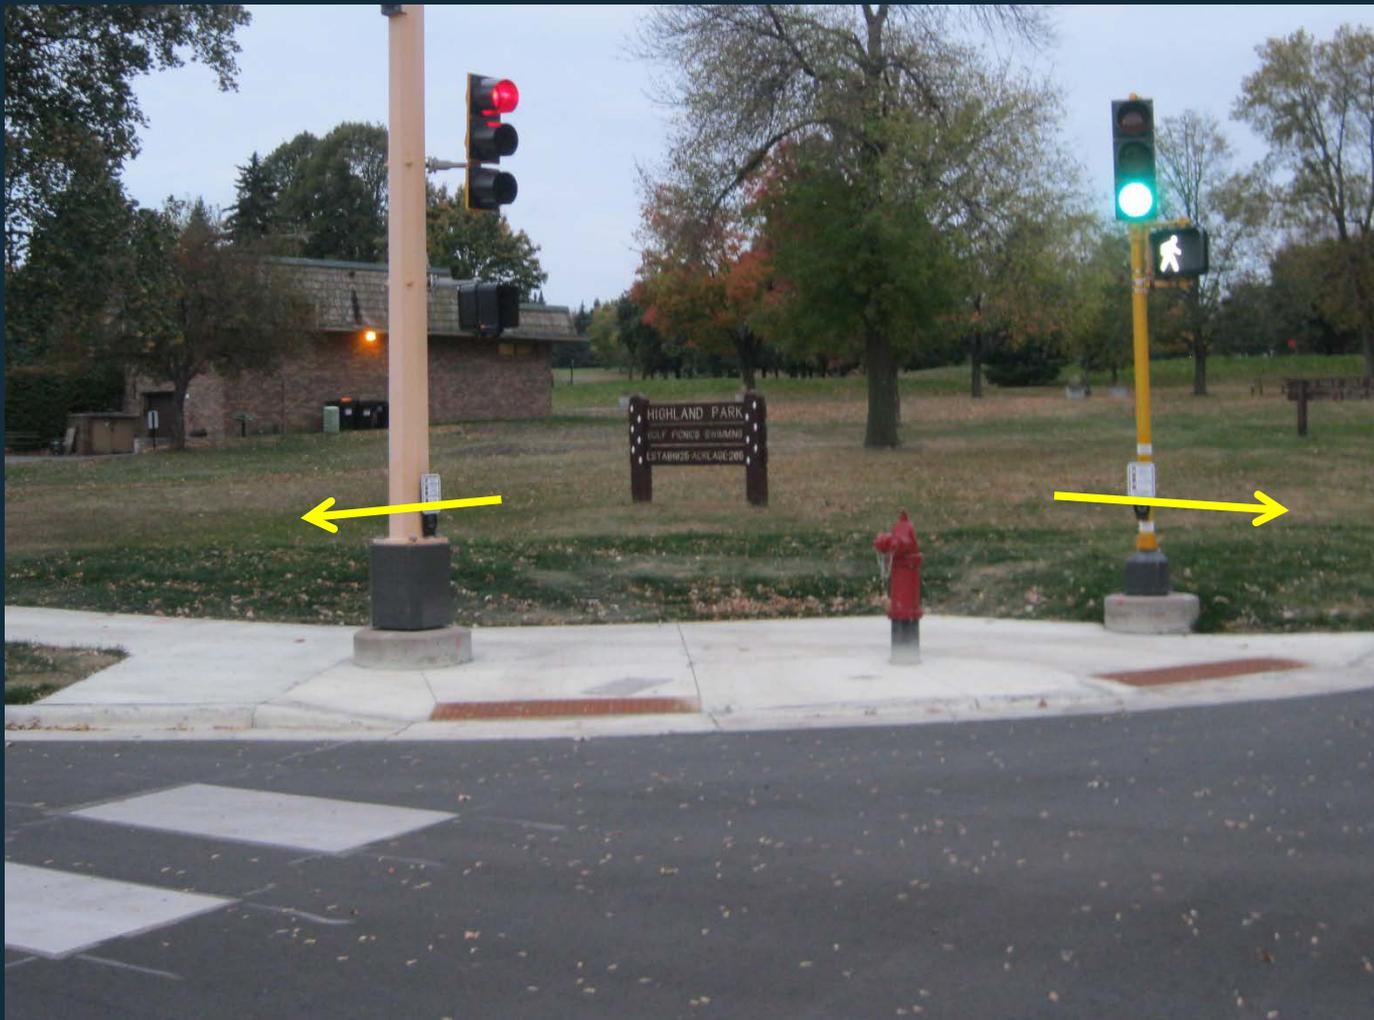

Figure 1: APS Guidance (1)

APS Compliance Checklist

1) Push buttons stations are properly placed and the push button faces are oriented properly.

APS Compliance Checklist

2) There must be a 4' x 4' landing adjacent to the push button.

APS Compliance Checklist

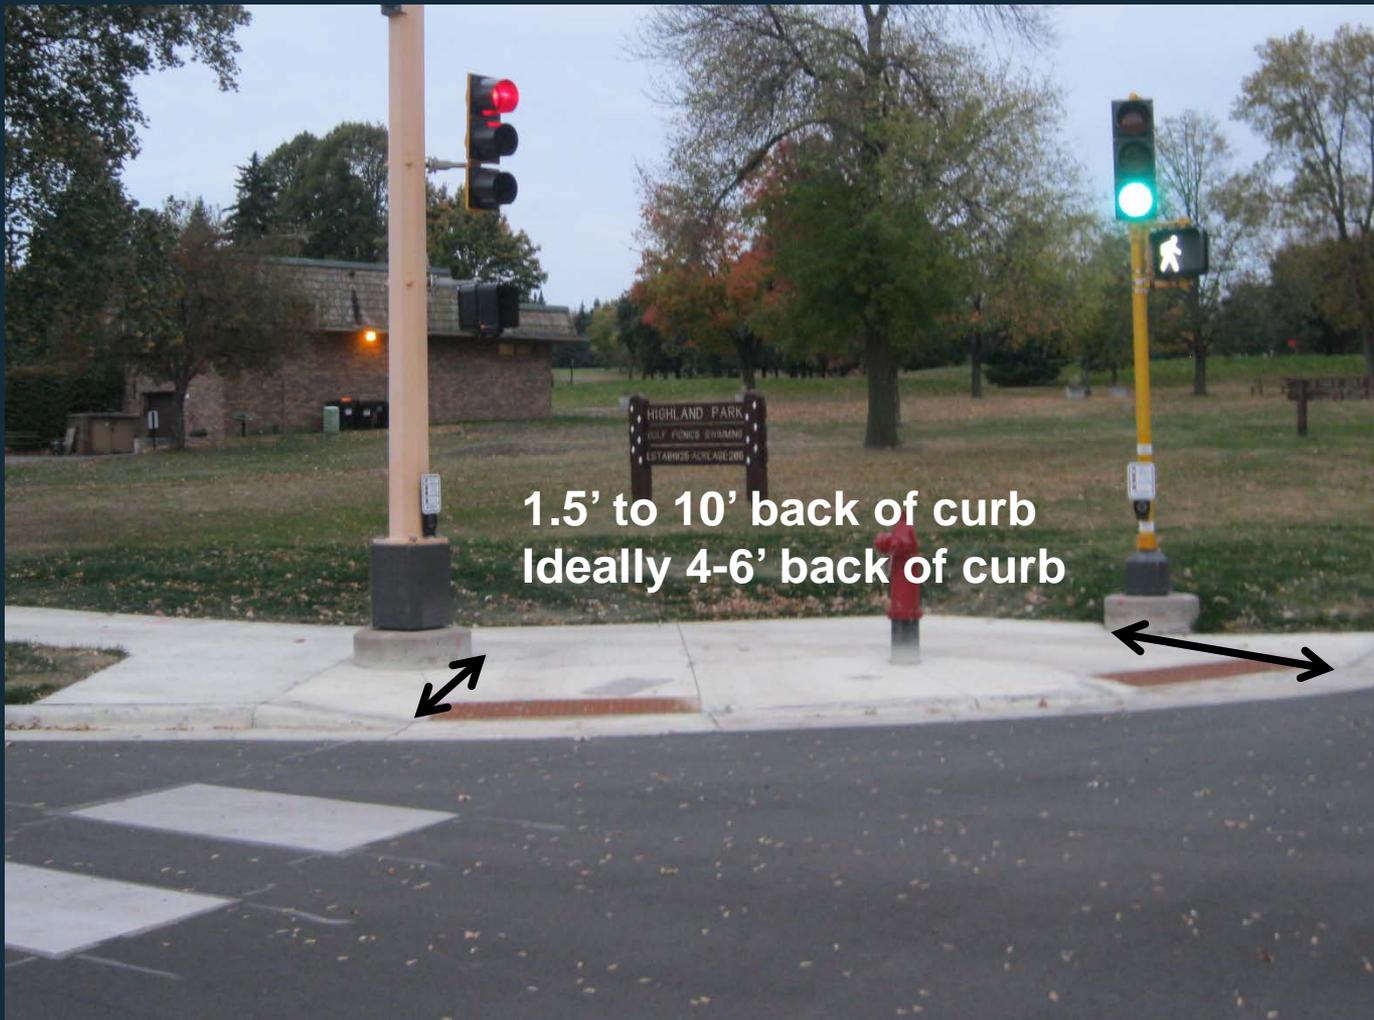

3) Distance from crosswalk edge to push button face: _____

APS Compliance Checklist

4) Distance from the push buttons to the back of curb: _____

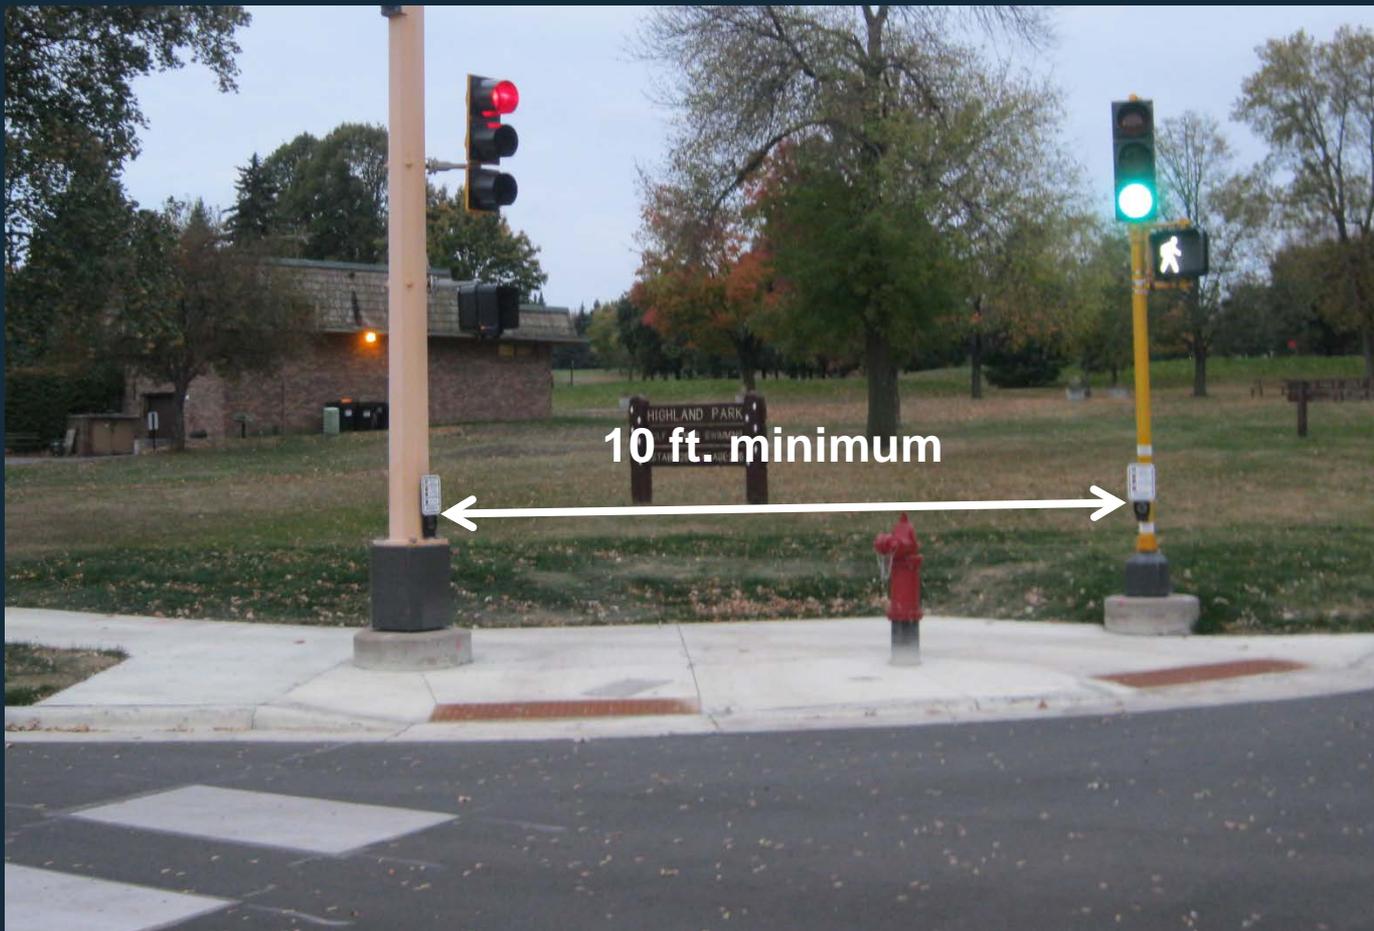

1.5' to 10' back of curb
Ideally 4-6' back of curb

APS Compliance Checklist

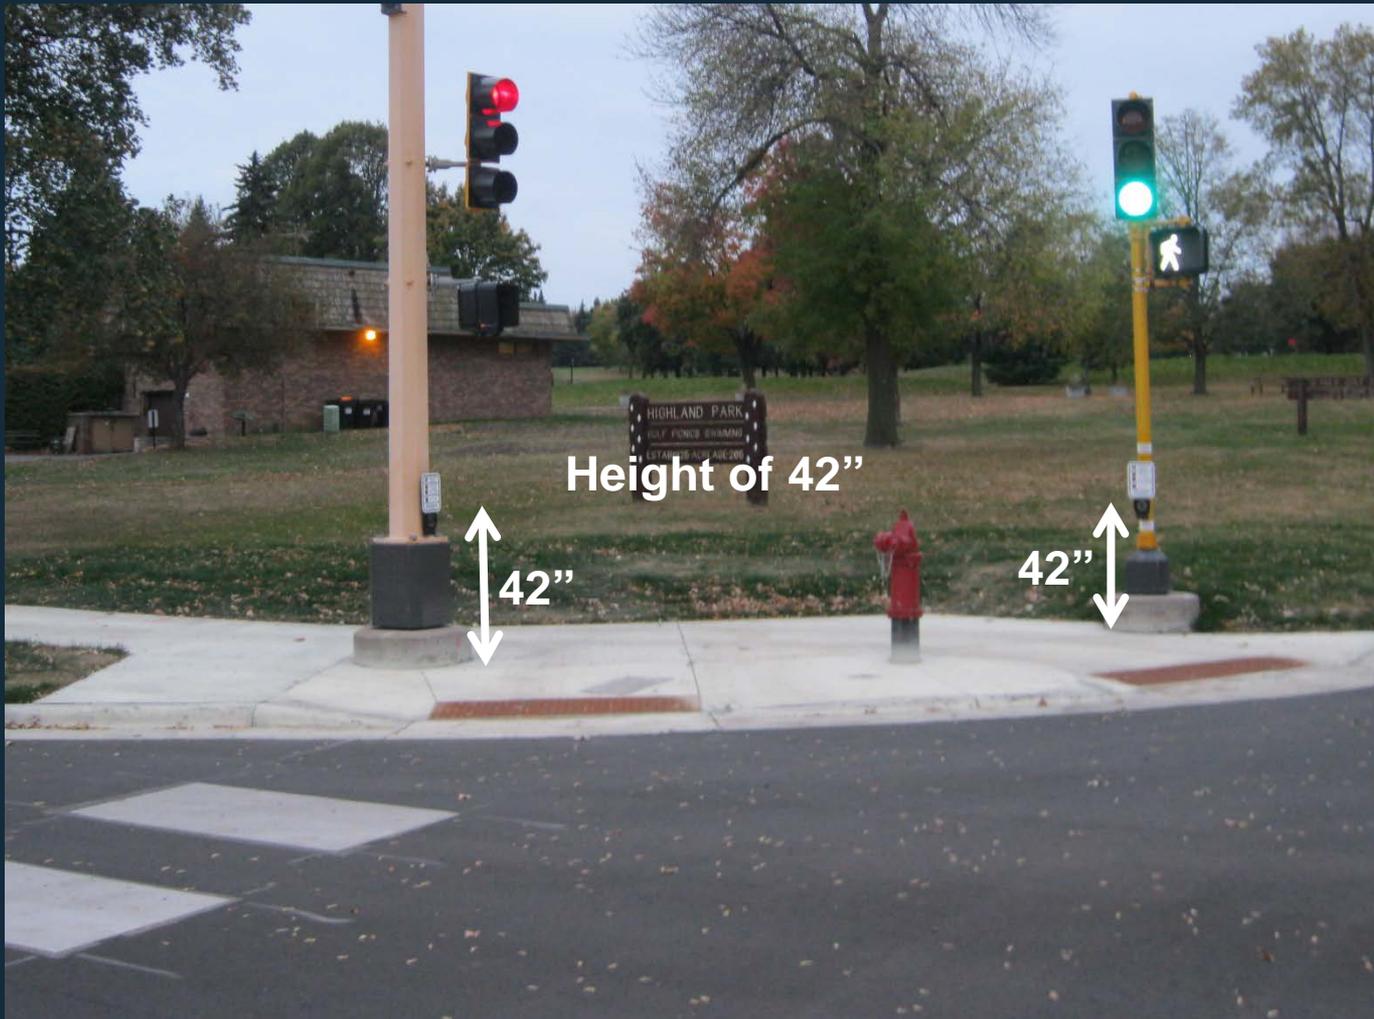

5) Distance between the push buttons: _____

APS Compliance Checklist

6) Push button height: _____

APS Compliance Checklist

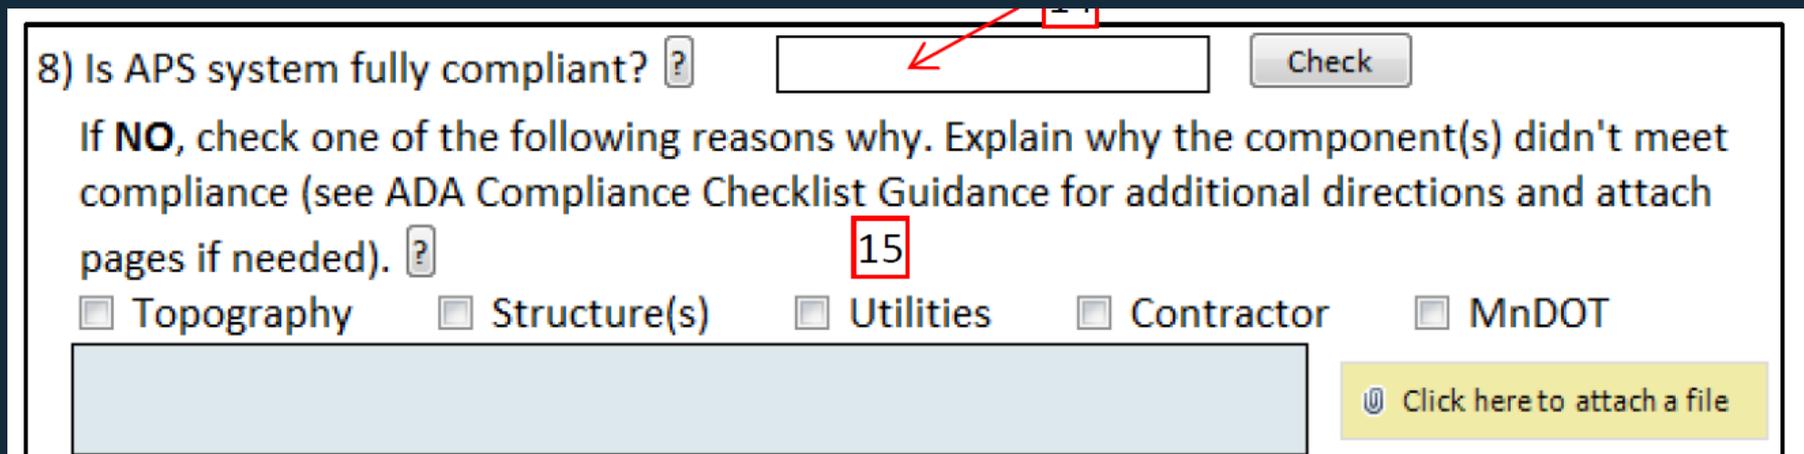

7) The push button needs an unobstructed side reach of 10" maximum.

APS Compliance Checklist

8) Is APS system fully compliant?

A screenshot of a web-based form for the APS Compliance Checklist. The question "8) Is APS system fully compliant?" is followed by a dropdown menu with a red arrow pointing to it and a "Check" button. Below the question, there is a text area for explanation and a "15" in a red box. There are five checkboxes: "Topography", "Structure(s)", "Utilities", "Contractor", and "MnDOT". A large light blue rectangular area is present below the checkboxes, and a yellow button with a paperclip icon and the text "Click here to attach a file" is on the right.

8) Is APS system fully compliant?

If **NO**, check one of the following reasons why. Explain why the component(s) didn't meet compliance (see ADA Compliance Checklist Guidance for additional directions and attach pages if needed). **15**

Topography Structure(s) Utilities Contractor MnDOT

D) Contractor Performance:

If the ramp could have been constructed to be compliant, but the contractor failed in constructing a compliant ramp.

Submit both the noncompliant form and the corrected compliant form.

This is important project documentation that will need to be retained.

APS Compliance Checklist

Supplementary Checklist Information to help provide Constructability, Maintainability, and Usability

- 9) Has a 6' maintenance access route (MAR) been maintained? 16 Yes No
- 10) Are push buttons situated at least 2' away from both the back of walk and ramp grade break? 17 Yes No
- 11) Are all newly constructed hand-hole(s) located outside of pedestrian access route (PAR)? 18 Yes No

12) Was the ramp able to be built according to the plan details?

Were significant changes required for push buttons during construction to make facility compliant?
