

As-Built Special Provision 2011.601

The statewide as-built special provision and pay-item was developed by a Metro Committee in 2011 in order to create consistent spec language, comply with Gopher State One Call, and track as-built costs. The specification was implemented by the Metro District in 2015 on all projects that contained signals, lighting, ITS, signs and drainage. Since 2015 every other MnDOT district has started to implement the As-Built spec, and in Fiscal Year 2017, 1/3rd of all MnDOT projects used it.

Use of As-Built Data

- Planning for MnSHIP and CHIP
- Scoping for the STIP
- Planning and tracking Maintenance resources (LEM\$)
- Tracking asset condition inspection needs and scheduling
- Calculating asset life cycle costs and meeting MAP-21 requirements (Transportation Asset Management Plan)
- Reporting on Infrastructure analytics (I.e. system size and asset value)
- Supplying data for emerging technologies - driver assist and autonomous vehicles
- Assisting Gopher State One Call locates

District As-Built Key Contacts - *Under Development*
