

Belly Dump Wedge Paver

Product Info

Cost

\$6,000 - \$8,000

Advantages

- ◆ More efficient than our traditional wedge pavers attached to a skid loader
- ◆ Less expensive to operate compared to several plow trucks.
- ◆ Mounting takes about 1.5 Hours
- ◆ Built strong to withstand age and elements.
- ◆ Uses self-contained electronics over hydraulics and requires only an electrical connection to the trailer.

Description

This device comes from District 8. They currently have 2 of these wedge pavers that are capable of mounting onto any belly dump. They were built roughly 17 years ago by a talented welder who has since retired. This unit makes quick work of filling in wheel tracks. The belly dump is able to haul more than 2 tandem trucks of bituminous and is about 40% faster at applying it onto the road when compared to a skid loader mounted wedge paver.
