

## **Hazardous Abrasive Blasting Waste Transportation, Disposal and Documentation**

The abrasive blasting waste must be managed as hazardous waste. A hazardous waste manifest must be used to document transport and disposal of the material. A temporary [Regulatory Waste Activity Number](#) must be obtained prior to completing a hazardous waste manifest to transport the waste for disposal.

Only [MnDOT's approved hazardous waste contractor](#) can transport and dispose the abrasive waste.

MnDOT procedures for transporting and manifesting hazardous waste can be reviewed on the [MnDOT website here](#).

MnDOT personnel will sign the manifest as the generator. If a MnDOT person is not available to sign the manifest, the Contractor can sign. The transporter will also sign the manifest.

### *Paint Abrasive Blasting Waste Tracking Form*

A [waste tracking form](#) shall be filled out for each waste container by the MnDOT bridge inspector and kept on file permanently.

### *Documentation*

The Contractor must provide MnDOT with the following documentation for the project file within 30 days after shipment of abrasive blasting waste for disposal:

- Regulator waste activity number
- Weekly inspection records
- Waste tracking form
- Disposal record - Hazardous Waste Manifest and Land Disposal Restriction (LDR) Form
